#### Terms of Service (Step 4 of 4)

Review and agree to the End User Terms of Service by scrolling through the service terms language.

### **TWO-FACTOR AUTHENTICATION**

### What is it?

Two-Factor Authentication is an extra layer of security used to make sure that people trying to gain access to an online account are who they say they are.

An additional login credential beyond just the username and password—is required to gain account access.

It's an electronic authentication method in which a user is granted access to a website or application only after successfully presenting two pieces of unique user information that is only known and can only be supplied by the user.

### How does it work?

Getting that second credential requires access to something that belongs to you—such as a registered mobile device.

The security step requires two separate, distinct forms of identification to access your Commerce Trust mobile app.

The first piece of security information is your **username and password**. The second is a **one-use, numerical code sent via text message** to your smart phone or tablet.

#### **Manage Accounts**

Manage accounts allows for accounts that are held outside of Commerce to be added so the larger wealth picture is attained within the CT Mobile Application. This allows more accurate reporting and allows the Financial Advisor the ability to recommend goals based on the larger picture. Without these accounts, the Financial Advisor is limited to assist with goals based on the Commerce Only accounts.

The newly added account could take up to two days to finalize and get added to the list of accounts. Once it is added, it will show up under Connected Accounts.

If accounts are not available to add automatically via the 'Add Accounts' option as described above, they can be added manually. This is typically a car loan, home loan, and assets. However, credit cards, stocks, etc. can be added this way as well.

When accounts are added via this route, updates to balances will need to be made manually.

From the Managed Accounts tab, select 'Add Accounts', then 'Manually Enter Accounts'.

Now select the type of account to be added. What you select is how your account will appear in the balance sheet and other asset allocation charts. In this example, 'Personal Property' has been selected.

First, update detail regarding the account. Use as much detail as desired. Name and Type of Personal Property are required; then select Next.

Second, enter information regarding classification of the account. This will help the application classify the account correctly; then select Finish.

Finally, the account has been manually added as part of the 'Connected Accounts' section of the Manage Accounts tab.
